Projects

ERP – Construction Management System

Developed **ERP**, a specialized **Enterprise Resource Planning (ERP) system** tailored for the **construction industry** to streamline project management, financial tracking, and resource allocation. Built with **Laravel** for a scalable and secure backend and **JavaScript** for dynamic interactivity. Integrated **Metronic** for a professional and responsive UI

elmasry-motors [🔗](#)

Technologies: Laravel, MySQL, js

Developed **Elmasry Motors**, an advanced automotive trading platform that allows users to browse, compare, and purchase vehicles seamlessly. Designed and implemented the backend architecture using **Laravel**, ensuring a robust and scalable system. Integrated **Livewire** for real-time interactivity, **Yajra DataTables** for efficient data handling, and **Metronic** for a sleek and responsive UI.

School Management SaaS Platform

Developed SaaS (Software as a Service) platform designed to enhance collaboration and management for **schools, teachers, and students**. The platform includes modules for managing classes, assignments, student progress tracking, attendance, role involved designing and implementing a **multi-tenant architecture**, building **RESTful APIs**, and developing user interfaces using **Livewire** for real-time interactivity. Ensured data privacy across tenants and created role-based access control for different user types (admin, teacher, student,school).

Octobios [🔗](#)

B2B Ecommerce

Developed a comprehensive B2B E-commerce platform allowing multiple traders to connect with vendors. The platform includes features for product management, order processing, and vendor analytics

My role was backend developer. I designed and implemented the database architecture for users, vendors, products, orders, and analytics data.

Healthcare App [🔗](#)

A specialized healthcare application designed for Dr. Germaine Alfred, a consultant in pediatrics and neonatology. The app provides an all-in-one platform to streamline and digitize patient care services. It enables doctors to manage patient records, schedule appointments, conduct virtual consultations, and issue electronic prescriptions. With an intuitive user interface and secure backend infrastructure, the app significantly reduces waiting times, improves operational efficiency, and enhances the overall patient experience. It's tailored to meet the modern needs of medical professionals seeking digital transformation in healthcare.
